Why

One day of marching band camp (4 hours) is equivalent to one week of class instruction during school. This is when the band learns all the skills needed for marching band. Also, the band learns the majority of the halftime show during these two weeks.

Failure to attend some or all of marching band camp may result in sitting out of one or more performances until the student is caught up. This is due to the safety factor of having students on the field not knowing where/when/how to march. Also, we want every student to feel confident and proud of their performance.

How

Work on your music this summer and come to camp prepared and with a positive attitude. Take private lessons - View list of suggested private teachers on the band website. You will order the needed equipment at camp and pay in the bookstore the first week of school (Flip folders, lyre, marching shoes, gloves, and t-shirt).
